

Organization & Departmental CDM Reviews and Baseline Pricing Analysis

Have you considered the following benefits that can be achieved as a result of concentrated Charge Description Master (CDM) reviews aligned with a baseline pricing analysis of your CDM:

1. Standardization and consistency in charging and charge processes across your organization.
2. Awareness to non-compliance situations.
3. Improve revenue levels, lower A/R days and improve claims adjudication.
4. Awareness to your organization's pricing in relation to your organization's market place.
5. Improvements to maintaining up to date CDM files.

DIVURGENT's differentiators include:

1. Our baseline pricing process provides perspectives to similar size/service level related facilities, and a perspective to other healthcare organizations within your organization's immediate region.
2. Our CDM review process allows for multiple passes on recommendations starting with an automated review, review by a seasoned consultant and finalized with your organization's department and financial area personnel. Most other industry reviews allow for one pass and possible secondary review/approval reviews.
3. We bring automated tools to engagements reducing analysis time and increase immediate visibility to existing issues.
4. Our approach is supported by experienced consultants in each specific area with extensive operational and charging/revenue knowledge.
5. Both processes are repeatable and available to be conducted on a routine basis internally or with external consultative support.

Please contact us at DIVURGENT should you have any questions and/or interest in the above.
