

Divurgent is a recognized leader focused on the business of hospitals, health systems, and affiliated providers. The unique combination of our decade-long commitment to aligning clients' goals with the future state of healthcare; our proactive approach to today's top healthcare security challenges; and our team of industry best practitioners in healthcare, IT strategy, and cybersecurity positions us to provide the most effective healthcare security advisory and operational expertise within the healthcare IT industry.

Today's threat landscape is volatile and adversaries continue to adapt their attack methods to breach healthcare organizations and gain unauthorized access to protected health information, medical devices, and more. Divurgent's Healthcare Security Services Portfolio arms our clients with the people, processes, and technology necessary to maintain quality patient care while protecting patient privacy.

## **Healthcare Governance, Risk, & Compliance (GRC) :**

Our specialized Advisory Team comprised of both healthcare and cybersecurity experts allows us to deliver qualified GRC assessments and targeted Risk Management services to our clients.
