

Microsoft 365

Implementation & Support

As a Microsoft Gold and Silver-level Partner, Divurgent is positioned to work with your organization on the implementation and deployment of your Microsoft Platform. Our experienced and multi-application-certified team of experts can help your organization maximize often underutilized, but powerful, collaboration, and productivity tools early in the implementation and deployment phases.

As leaders in Microsoft innovation, we can help your organization do more than you imagined with your product suite, and design an implementation, adoption-forward approach based on your organizational goals and needs. Our partnership with Microsoft allows us to deliver everything you'd expect from Microsoft, with the added benefit of our top executives invested in your success.

Enterprise Level Security

Azure

Development of a cloud architecture and governance process will ensure a successful migration from the current, on-premise to future state cloud/hybrid solution is implemented with long-term Information Technology growth being considered.

Office 365

Development of a readiness assessment will help guide the transition from an on-premise based infrastructure (exchange) to a cloud/hybrid solution for your back-end infrastructure (SharePoint, Active Directory, etc.) to be easily migrated via Microsoft's Cloud Sync Toolset.

Security and Compliance review and governance will be a key requirement to develop the Transformation and Strategy for your Office 365 migration.

Microsoft Teams

Development of strategy to implement Teams to allow for collaboration of the specific requirements to support a health-care organization; application of templates to support clinical and/or administrative needs.
